Needle moving action has been spotted in MSM MALAYSIA HOLDINGS BERHAD (5202.KL) as shares are moving today on volatility -1.04% or -0.04 from the open. The BM listed company saw a recent bid of 3.80 and 19900 shares have traded hands in the session.

Dedicated investors are usually on the lookout for promising stocks that have been overlooked by the investment community. They may be searching for companies that have slipped under the radar and are primed for a move higher. Some investors may do the research and locate these stocks that are infrequently in the financial news headlines and are relatively unknown by the average investor. These stocks may be smaller cap, trading on a foreign exchange, or stocks that used to be prominent that have not been part of the conversation recently. Finding these stocks may take some extra research and effort. Investors who are able to do enough digging may be able to find some great names to help support the stock portfolio.

MSM MALAYSIA HOLDINGS BERHAD's Williams Percent Range or 14 day Williams %R currently sits at -96.77. The Williams %R oscillates in a range from 0 to -100. A reading between 0 and -20 would point to an overbought situation. A reading from -80 to -100 would signal an oversold situation. The Williams %R was developed by Larry Williams. This is a momentum indicator that is the inverse of the Fast Stochastic Oscillator.

Currently, the 14-day ADX for MSM MALAYSIA HOLDINGS BERHAD (5202.KL) is sitting at 17.13. Generally speaking, an ADX value from 0-25 would indicate an absent or weak trend. A value of 25-50 would support a strong trend. A value of 50-75 would identify a very strong trend, and a value of 75-100 would lead to an extremely strong trend. ADX is used to gauge trend strength but not trend direction. Traders often add the Plus Directional Indicator (+DI) and Minus Directional Indicator (-DI) to identify the direction of a trend.

The RSI, or Relative Strength Index, is a widely used technical momentum indicator that compares price movement over time. The RSI was created by J. Welles Wilder who was striving to measure whether or not a stock was overbought or oversold. The RSI may be useful for spotting abnormal price activity and volatility. The RSI oscillates on a scale from 0 to 100. The normal reading of a stock will fall in the range of 30 to 70. A reading over 70 would indicate that the stock is overbought, and possibly overvalued. A reading under 30 may indicate that the stock is oversold, and possibly undervalued. After a recent check, the 14-day RSI for MSM MALAYSIA HOLDINGS BERHAD (5202.KL) is currently at 30.90, the 7-day stands at 21.50, and the 3-day is sitting at 12.58.
